SUMMARY

Experienced Full-Stack Developer with 2.7 + years of expertise in designing, developing, and deploying scalable web applications using Node.js and React. Proficient in front-end development with React Hooks and server-side programming with Node.js. Experienced in building RESTful APIs, integrating third-party services, and implementing data solutions with MongoDB (NoSQL) and SQL databases. Skilled in software development, optimizing performance, troubleshooting complex issues, and ensuring robust security.Experienced in conducting code reviews, enhancing code quality, and implementing comprehensive testing procedures. Collaborative team player with proficiency in Git, managing responsibilities within agile environments, and working with the MERN stack.

SKILL

Technologies: React.js, Node.js, Express.js, JavaScript, Redux, Python, MySQL, MongoDB
Version Control: GIT
Other Tools: RESTful APIs, JSON, XML

EXPERIENCE

Software Developer – Sagacious IP, Gurgaon   (APRIL 2024 - PRESENT)

- Developed a Performance Management System (PMS) using React.js (front-end) and Node.js (back-end), enabling seamless employee reviews, appraisals, and evaluations, and increasing employee satisfaction by 25%.
- Implemented automated workflows for the PMS, streamlining the appraisal and feedback processes, and reducing administrative overhead by 40%, leading to significant time savings for HR teams.
- Integrated real-time feedback and performance analytics modules, providing managers with actionable insights to enhance employee development and improve decision-making processes.
- Designed and deployed custom reporting features, allowing HR teams to generate

performance reports, track employee growth, and identify areas of improvement efficiently.
- Optimized the system's scalability and performance by leveraging Node.js and MongoDB,

Junior Software Developer - Sagacious IP, Gurgaon (APRIL 2023 - APRIL 2024)

- Spearheaded the **development of backend API services**, ensuring smooth data transactions.
- Designed and optimized key modules like **HR Dashboard, Quality Tracker, Timesheet, and Ticketing System**.
- Improved system scalability by **structuring MySQL databases efficiently**, reducing downtime and increasing data retrieval speed.
- Conducted **code reviews** to maintain high coding standards and security compliance.

Trainee - Sagacious IP, Gurgaon (AUG 2022 - APRIL 2023)

- Developed a tool to manage Intellectual Property (IP) and streamline the innovation process, providing clear views and actionable insights for IP admins and executives.
- Built a real-time tracking system for inventors, increasing transparency and understanding of the monetization process.
- Designed and developed responsive user interfaces using HTML and CSS, ensuring a seamless user experience across devices.
- Excelled in API integration, database optimization, and version control using GIT, enabling efficient development and deployment.

PERSONAL PROJECT

Book My Show Clone (APRIL 2024 - PRESENT)

React.js, Redux, Tailwind CSS, Node.js, Express.js, MongoDB, JWT, Razorpay

- Developed a full-featured movie ticket booking web application using the MERN stack.
- Implemented secure authentication using JWT tokens for both users and admin roles.
- Users can browse movies, select seats, choose a date, and make payments through Razorpay Payment Gateway.
- Integrated Razorpay Payment Gateway to handle real-time payments securely, with dynamic amount calculation and status tracking.
- Admin panel enables adding new movies and viewing all booking details.
- Built responsive, user-friendly UI using React.js, Redux for state management, and Tailwind CSS for styling.

- Designed RESTful APIs in Express.js and managed data with MongoDB, ensuring performance and scalability.
